

A warm, intimate scene of a woman with her hair in a ponytail, wearing a plaid shirt, sitting on a light-colored sofa and reading a book to a young child. The child, wearing a green shirt, looks up at the book. A tall floor lamp with a white pleated shade stands to the left, casting a soft glow. The background is a white brick wall, and a wooden plant stand with potted plants is visible on the far left.

Product & Pricing Manual

LED : Light Emitting Diode

LEDs are miniature Light Sources made of semi-conductor material. They work on the basic principle of a p-n junction diode. When appropriate DC voltage is applied to it, the diode is forward biased (on), the electrons are able to recombine with holes and energy is released in the form of light.

This effect is called electro luminescence and color of light is determined by the energy gap of the semiconductor.

LED Lamp:

A LED lamp (also called LED bar or Illuminator) is a type of solid state lighting (SSL) that uses light-emitting diodes (LEDs) as the source of light. They usually comprise clusters of LEDs in a suitable housing.

LEDs by nature emit light in a very small focused wavelength range that is characteristic to the energy band gap of the semiconductor. In order to overcome this, two primary methods of creating white light from LEDs are being used, Red-Green-Blue LEDs and phosphor converted LEDs.

Why LED:

Lower Energy Consumption
Longer Lifetime
Improved Robustness
Smaller Size

Instant Start: LEDs are ideal for use in applications that are subject to frequent on-off cycling, unlike fluorescent lamps that burn out more quickly when cycled frequently or HID lamps that require a long time before restarting. LEDs are easily dimmable.

Environment Friendly - Does not Contain Mercury.

Solid package of LED can be designed to focus its light. Incandescent and Fluorescent sources require external reflector for the same. Reduced CO₂ emission

LEDs are shock resistant being solid state components.

Applications:

- General lighting
- Indoor Lights
- Outdoor Lights
